Subject: Application for Junior Web Developer Position | Kevin Chris L. Durango
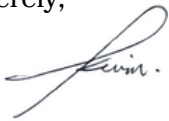

Dear Sir/Madam,

With great enthusiasm, I am applying for the Junior Web Developer position at your esteemed company. As a recent graduate of Bachelor of Science in Information Technology from Negros Oriental State University (June 27, 2025), I am eager to bring my strong organizational skills, tech-savviness, and proactive attitude to your team.

I am passionate about providing reliable support, staying organized under pressure, and helping teams operate smoothly behind the scenes. During my academic and internship experiences, I honed my communication, multitasking, and time management abilities and traits, In which I believe are essential for success in a Junior Web Developer role.

I am fully prepared to complete any application requirements, participate in training, and begin working as soon as needed. Attached is my résumé, which highlights my qualifications and hands-on experience.

Thank you for considering my application. I look forward to the opportunity to contribute to your team and further discuss how I can be of value to your organization.

Sincerely,

KEVIN CHRIS L. DURANGO

WORK EXPERIENCE

Lumenvo Digital Agency – Remote/Philippines
July 2024 – January 2025 (800 hours)

- Completed 800 hours of internship focused on website and e-commerce system development with the guidance of Senior Developers of the Company
- Was tasked in creating e-commerce product pages, forms, shopping cart features, and data display using Bootstrap, CSS.
- Worked on both frontend (HTML, CSS, Bootstrap) and backend (PHP, MySQL) tasks.
- Participated in regular team meetings, applied feedback, and followed development workflows
- Strengthened skills in coding, debugging, database handling, version control (Git), and responsive design.

PROJECTS

Farmers Market Management System

Full-Stack Developer | Capstone Project

- Developed a full-featured agricultural marketplace platform connecting farmers and consumers via web and mobile application.
- Built core systems including product and inventory management, order processing, pickup scheduling, payment integration, and dashboard analytics.
- Designed and implemented role-based access for 5 user types: Admin, Manager, Org Head, Farmer, and Consumer.
- Created modules for farmer profiles, barangay-level analytics, and interactive sales visualizations.
- Delivered a cross-platform React Native mobile app with real-time sync and offline capabilities.
- Engineered a complex relational database with 15+ linked tables supporting geographic and transaction data.

- Tech Stack: PHP 8+, MySQL, React Native (Expo), TypeScript, Bootstrap, Chart.js, RESTful APIs
